## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over OSBORNE (US 6722404) in view of POSGE (US 5893259).

OSBORNE discloses strips of syringes (110) held in bandolier format by opposing web bands (130, 140) (See Figures 1 and 3) but does not specifically disclose them being banded in groups or handled by the claimed transfer device.

POSGE discloses a method and apparatus for forming groups of parallel articles where individual articles (24) are indexed through a transfer mechanism (48, 28, 54) which is controlled by a controller (50) to index the articles through, form them into groups, and deliver them to packaging means (See Figure 1.)

It would have been obvious to one of ordinary skill in the art at the time the invention was made to create the regular, parallel groups of articles in the invention of OSBORNE using the method and aparratus disclosed by POSGE in order to provide an automatic and regulatable way of providing the groupings.
